k) The writing is clear and concise	1	2	3	4	5
l) The paper is stylistically and grammatically correct	1	2	3	4	5
Comments					
3. Decision:					
<input type="checkbox"/> Accepted					
<input type="checkbox"/> Accepted with minor revision					
<input type="checkbox"/> Accepted with major revision					
<input type="checkbox"/> Rejected, but suggesting resubmitting after radical refinement					
<input type="checkbox"/> Rejected					
4. Paper category:					
<input type="checkbox"/> ORIGINAL SCIENTIFIC PAPER – a paper containing the hitherto unpublished results of the original research in full form.					
<input type="checkbox"/> PRELIMINARY COMMUNICATION – a paper containing previously unpublished preliminary results of an ongoing scientific research that should be published quickly.					

[] **REVIEW ARTICLE** – a paper containing an original, concise and critical account of an area or a part of it, in which the author himself actively participates. The role of the author's original contribution in this field should be emphasized in the light of already published works and an overview of those works.

[] **PROFESSIONAL PAPER** – a paper containing useful contributions to the field that are not related to the author's original research, and the observations made need not be new to the profession.

5. Additional comments or suggestions for the author:

6. Short explanation of the reasons for choosing the category of work:
